## Metallurgy Gold (\$MGLD) - TOGETHER TO THE GOLD ASTEROID AND BEYOND!

### INTRODUCTION

**Metallurgy Gold (\$MGLD)** is an investor driven deflationary Bep-20 token built on the Binance Smart Chain (BSC) network, one of the most secure decentralized networks in existence. The BSC platform maintains low transaction costs while providing superior performance. From fiat currency to BNB to \$MGLD Coin, across digital platforms value is distributed in a safe and efficient manner to our community of investors.

\$MGLD is a special meme-based cryptocurrency that is innovative and offers blockchain solutions. It has utility and serves as a currency for the platform consisting of real-world projects designed to generate passive income and wealth building opportunities for our investors. MetallurgyGold was only minted with a 10 billion token supply and 4 decimals. As the demand increases and supply becomes more scarce, the price and value for our dedicated holders with increase to the moon and beyond.

## **COMPETITIVE ADVANTAGE**

We think **Metallurgy GOLD (\$MGLD)** will be highly appreciated by the crypto community. We feel the same as most investors out there – we are tired of seeing dozens and dozens of Inu, Dodge, and Moon-based knock off projects with no real-world use. Those projects are often short-term flashes in the pan that provide limited value and have no wealth generating capability for investors. We are not one of those crazy and unrealistic tokens out there with a 10 Billion supply that will never shift zeros and never be impacted by supply and demand factors.

Furthermore, we are not one of those projects that promise all and deliver nothing. Too many projects promise to clean all the air, clean the entire ocean, plant all the trees, save all the dogs, but too often just fly off into outer space with your money. We believe in being environmentally responsible and supporting innovation and space exploration, but we will never mislead our investors and never promise more than what can be delivered. **Metallurgy Gold (\$MGLD) addresses the plethora of weaknesses inherent in the meme-coin crypto market.**

## **DEVELOPMENT TEAM**

As developers - we are fully committed to the long-term success of this project. We are tasked with the responsibility to fully develop all aspects of the project and to meet all key objectives, as described in the Roadmap. Unlike most other projects out there, our community of holders will truly provide their feedback to shape and drive development. On the website, surveys will be regularly available so you can vote on all key decisions that shape the development of \$MGLD and the projects and initiatives. You can have total confidence in the commitment, expertise, and integrity of the development team.

## **\$MGLD VALUES**

The development team has invested in crypto currencies for a number of years and experienced many different types of projects, too many involving unsavory characters, honeypots, and rug pulls, including bot damaged projects. We have also experienced a number of solid, legitimate, innovative, and great projects. These experiences inform our actions and the following strong values:

1. **Total transparency** and **collaboration** with all of our community
2. **Safety** and **fairness** for all holders (no honeypot code; no rug pulls)
3. **Commitment** to long-term development, progress, and success
4. **Implementation of** innovative projects with real-world use and utility
5. Providing **value-added** and promoting **wealth building** opportunities

We want you to realize that you finally found a great token that is honest and fair to all. You will feel major confidence and happiness in knowing you made a wise choice by acquiring \$MGLD and watching your tokens and money increase along with \$EGLD balance.

## **FAIR LAUNCH**

The plan is for you to be able to purchase \$MGLD directly on **Pancake Swap**, without any pre-sales or whitelists, was VIDEO live fair launched. This is a completely safe, innovative, and potentially skyrocketing crypto currency project for all investors. The fair pre-sale will provide opportunity to reward early investors that see the significant value and potential in the Meta and that support the development and expansion of \$MGLD.

**Together we can become the most successful BEP-20 project in the world. Together we launch and rocket to the moon and beyond!!!**

## **LOCKED LIQUIDITY**

**90%** will be third party locked DXSALE in the \$MGLD liquidity pool on Pancake Swap. The BNB locked as liquidity will be unrippable as no investor and no member of the dev team can remove the Liquidity Pool (LP).

Our investors should have total confidence in the security of the LP and in the long-term opportunities inherent in our projects. We encourage and incentivize investors to hold and support development of \$MGLD, and to buy and sell when they wish. **We want all of our investors to have the opportunity to become successful based on their courage and talents with \$MGLD!**

## **\$MGLD TOKENOMICS**

### ***\$SEGLD 10% DIVIDENDS PER TX***

Metallurgy GOLD (\$MGLD) tokenomics, transaction fees, and real-world projects are designed in a smart way to provide value-added and utility to our investors, to strengthen the token, to promote steady growth, and to achieve all key objectives. The auto-liquidity, redistribution rewards, and marketing fees are reasonable, competitive, and will also help protect our community of holders against trading bots, which look for “low to no” transaction tax fees. As a result, these bots often drain down the liquidity of a token project thereby increasing price volatility, slowing the trading volume, and project growth. The transaction fees, tokenomic strategies, and plan for programs will build wealth and make for the best BEP-20 Token opportunity available on the Binance Smart Chain Network.

### **AUTO LIQUIDITY**

\$MGLD has an automatic liquidity pool function. The network collects **1%** from each buy and **1%** of each sell transaction and adds it to the Liquidity Pool (LP) in Pancake Swap. This increases the locked Liquidity Pool, thereby supporting higher trade volumes, greater price stability, and the potential for an ever rising price floor. This will support all investors to be able to buy and sell whenever you wish. Auto-liquidity function strengthens \$MGLD for all investors, which is an important principle and strategic priority we are fully committed to maintaining.

### **AUTO-REFLECTION**

The auto-reflection and reward mechanism will proportionally distribute to all holders **10%** of every buy and **10%** of every sell transaction. You will earn passive income just by holding the token. This holding reward provides significant yield incentives in a frictionless manner to investors. Investors that hold more Metallurgy Gold (\$MGLD) in their wallet will receive a larger proportion of the statistic reflectionary yields. Their tokens will grow and compound in a linear fashion as well as exponentially.

Auto-reflection will provide great value and wealth to investors; especially when the price of \$MGLD increases over time as the demand for the token increases while the supply decreases. We encourage all investors to buy

and hold \$MGLD for the long-term to support development of all programs and initiatives and to maximize your potential profit earnings.

## **MARKETING & DEVELOPMENT**

All marketing resources will be used to maximize project implementation and success per the roadmap. In fact, **3%** of every buy and **3%** of every sell will be allocated to the marketing / development wallet for the following:

- To aggressively promote advertisements, branding, use of influencers, and to build global awareness;
- To accelerate all development and innovations in the roadmap;
- To focus all resources and maximum effort towards getting the \$MGLD listed on more and more exchanges and increasing the volume of purchases and trades.

## **\$MGLD COIN BUY BACKS**

On a monthly basis, a certain % of funds allocated will be used to perform token buy backs. This will further add liquidity to the LP and also reduce the circulating supply of the token and promote steady growth. We will perform token buybacks when after significant price trends reach a major level of support. Doing so will involve multiple buys that will promote increases in trading volume and provide greater stability and opportunities for holders.

*We will discuss with our holder community the best way to make use of the \$MGLD tokens obtained thru buy backs. We could burn the tokens and permanently reduce the supply; or perhaps pair them with other currencies in liquidity pools to earn additional value for all of our holders. We will think innovatively about the options and receive feedback from all holders.*

## **SECURITY**

The development team will protect the project and all investors against predatory trading bots as needed, such as pump and dump bots and scalping bots, which everyone may or may not notice. We will rely upon scanning tools and innovative technologies to protect your investments.

At the same time, the development team will never deploy trading bots on this project. The wellbeing of our holders, and the fairness of trading for all, are guiding principles that you can trust and rely upon.

## **\$MGLD PROJECTS**

### **DEX**

**<https://dex.metallurgy.gold>**

### **MERCHANT STORE**

An online store will be built and linked to website. Investors and the general public will be able to purchase token themed merchandize of excellent quality. These items will promote advertisement and branding of Metallurgy Gold \$MGLD. Other products and services will be added based on feedback from investors to increase the volume of sales and revenues.

### **COLLECTIBLES MARKETPLACE**

Metallurgy Gold (\$MGLD) will establish an online collectibles marketplace (using innovative smart chain contract technology) consisting of unique and superior quality colored art. Minting your NFTs and sell it on our platform will bring value to our ecosystem.

## **WEBSITE ENHANCEMENTS & BEP NFT Token**

As the Metallurgy (\$MGLD) will be the currency for all platforms and projects, we will launch an additional token based on the BEP-721 and / or the BEP-1155 Solidity smart contract standards. We will also develop, link with the \$MGLD website, and launch a \$MGLD NFT website to facilitate buying and selling colored arts and other rare collectibles. Our community of investors and the public will be able to use \$MGLD Token - to buy and sell colored NFTs from the website. A reasonable transaction fee will be assessed on buys and sells.

## **JUSTIFICATION & ADVANTAGES**

Here are the art market and investment issues our Collectibles Marketplace of Metallurgy Gold (\$MGLD) will help to ameliorate and provide a competitive advantage. We are going with the Binance Smart Chain BEP-721 and / or BEP-1155 sister token to our BEP-20. Binance Smart Chain NFTs will grow exponentially in the next 12 months and beyond because the transactions are lightening fast and the fees are very low. There is great demand for NFTs and great opportunities and more and more crypto NFT projects are moving to Binance Smart Chain, an under-developed platform for NFT's at this time. We have an innovative plan for focusing on unique collectibles with real-world use and utility to grow a major market and build wealth opportunities for our holders.

In addition, the colored NFTs market is not well understood by the public and investors.

## **NFT DIGITAL CERTIFICATE**

To address the above issues and to provide a competitive advantage for \$MGLD, a Collectibles Marketplace will be established that is trustworthy and where investors will enhance their education and knowledge and where they can buy legitimate and confirmed good quality colored art.

The NFT Digital Certificate is unique digital ID for each collectible that: (a) provides traceability during the entire Lifecycle; (b) keeps a decentralized record of each transaction; (c) ensures ownership, and (d) provides certification and authenticity. This makes investing in NFTs appealing, safer for buyers, and adds transparency and integrity to the process, while increasing the value of each NFT asset.

The NFT Digital Certificate makes each collectible special and one of a kind. This produces a type of scarcity-based hierarchy that enhances the real-world value of each colored collectibles. The Collectibles Marketplace - with issuance of NFT Digital Certificates - will bring participants in the crypto world and the public together in a powerful and increasing synergy to strengthen the colored NFTsmarket exponentially, both online markets and certain regional markets.

\

## **\$MGLD MOBILE APP**

We will develop and implement a mobile app. It will bundle all of the functions of \$MGLD together for easy exchange and management. Investors using the mobile app will be able to quickly view token prices, wallet balances, trade \$MGLD, monitor passive income. Investors and the public will be able to play the \$MGLD Mining Game and other games. Investors and the public will be able to buy items from the Metallurgy Gold Store and also buy and sell colored art (and other rare NFT collectibles) that are fully certified and that have an.

## **CHARITY PROGRAM**

We invite holders to send some BNB to the Meta-Mask Charity Wallet Address. All funds will be donated to help the nature and wildlife. Our greatest joy and highest calling will be to provide support to directly help any being in need. Every \$MGLD donation will be documented. We will list the GNO, address, website, and contacts on our webpage. When we convert charity BNB to spendable funds, a proof will go on the webpage. 100% of charity wallet funds will be donated to the most needy wild places.

## **CHARITY DONATION WALLET ADDRESS**

0xdf1c0Fbce3dC6e9484cef60f4269bFF33bBc01D

## **ROADMAP**

**Our Roadmap is Private, but our goal is not.  
Creating the biggest decentralized platform to  
buy/sell precious metals. NFT Market place  
and DEX.**

## DEVELOPMENT TEAM

**Gabriel Lucian @GabiFir**

**CEO Radu Daniel  
@icsmen**

## **CO-Founder Metallurgy Gold (\$MGLD)**

Welcome to the Metallurgy Gold website. Our most important priority is our community of holders. You are at the center of our values and actions. We are motivated by the endless possibilities of what we can imagine and do together. We want all holders to have the opportunity to achieve success and to build their wealth, leading to increased quality of life and higher levels of human development and happiness.

I have been an investor and also a supporter of numerous crypto projects since 2010. My knowledge, skills, and expertise will contribute to \$MGLD success for the benefit of all holders. I have a wealth of global experience and expertise. Over 10 years as a leader managing agency departments responsible for research, evaluations, assessment, and quality improvement.

## **CEO \$MGLD**

**/ am in crypto space from 2012,**

**Used blockchain technology since.**

**Been working for other projects and know methods to make Metallurgy Gold a successful project and SAFU longterm investment.**

**I am available each day on telegram group Video Voice Chat, do not hesitate. Or by e-mail :  
ceo@Metallurgy.Gold**

## **DISCLAIMER**

*This Whitepaper shares information with potential future token holders in connection with the upcoming fair launch of Metallurgy Gold (\$MGLD). Relevant and reasonable information are presented in this Whitepaper for the reader to evaluate in deciding on acquiring \$MGLD tokens.*

*All information in this whitepaper and on the website is provided solely for educational purposes and should not be perceived as financial advice. At the same time, nothing in this Whitepaper implies any components of a contractual relationship.*

*Trading cryptocurrencies / digital assets is a high-risk, high-volatility activity. Readers of this whitepaper should never put more resources into cryptocurrency buying than they can stand to lose. Before investing in a cryptocurrency, the reader should always seek professional investment advice.*

*Nothing in this White Paper shall be deemed to constitute an offering or a solicitation of an offer to buy any securities, commodities, or any other kind of financial instrument in any jurisdiction. Information provided constitutes descriptions of the \$MGLD and describes plans which are forward-looking statements. ## **HOW TO BUY ON PANCAKE SWAP V2**

1. Download & Setup a Meta Mask or TrustWallet. Meta Mask is a crypto wallet in form of a chrome extension; Trust Wallet is an app for your phone.
2. Add Binance Smart Chain to your network-list. See Binance website for more info.
3. Buy and send BNB to your Meta Mask or TrustWallet. You can buy BNB on any exchange (i.e. Binance, Kraken, Coinbase etc.).
4. Transfer the tokens to your Meta Mask or TrustWallet address.
5. Go to PanecakeSwap Exchange and connect your wallet address. <https://pancakeswap.finance/swap>
6. Select the From token as BNB, after that your balance will appear; next, select the To Currency and add the \$MGLD contract to buy: <https://bscscan.com/token/0x87ae87773345fa023e7d1556b1159af6b74cbb57>
7. Adjust slippage tolerance to at least 14%
8. Swap BNB for \$MGLD, approve the smart chain confirmation that will appear.
9. After that, Metallurgy Gold (\$MGLD) will appear in your wallet.
